Executive Summary:

Passionate junior software developer who has completed a Professional Diploma in Full Stack Software Development at Code Institute-UCD. Adaptable team player and adept at thriving under pressure. Seeking a dynamic developer role to contribute, learn, and expand my expertise. Proficient in front-end and back-end languages, with experience in databases. I have plenty of experience in customer-facing roles and am very comfortable in social scenarios. I firmly believe that fostering strong interpersonal relationships with workmates directly improves the quality of the work.

Education:

- *Professional Diploma in Full Stack Software Development Code Institute* (CI UCD) – University Accredited by the University of West Scotland and UCD **MERIT QUALIFICATION**
  (09/2022 – 08/2023)
- *Full Stack Engineering course* – CodeCademy
  (11/2023 – present time)

Technical Skillset:

- **Technologies**: HTML, CSS, JavaScript, React.js, Python
- **Databases**: SQL, Django
- **Frameworks**: Bootstrap
- **Version Control**: Git, Github, Heroku

Portfolio Projects:

1. **Ireland's National Parks**: Interactive website showcasing Ireland's National Parks for locals and tourists.
   Technologies used: HTML, CSS.
   GitHub: [ireland-national-parks](#)
2. **Blackjack 21**: Engaging website presenting a game of Blackjack 21. Technologies used: HTML, CSS, JavaScript.
   GitHub: [blackjack-21](#)
3. **Surprise Tours**: Dynamic front and back-end app simulating a travel agency. Customers can book tours, register, and leave reviews.
   Technologies used: Python, JavaScript, SQL, Django, Stripe.
